

**SMALL ENOUGH
TO CARE ...**

**... AND BIG ENOUGH
TO DELIVER**

**OUR TESTING SERVICES
INCLUDE THE FOLLOWING
AREAS:**

- Physico-Chemical Properties
- In vitro / in vivo Toxicology
- Mutagenicity / Genotoxicity
- Aquatic and Terrestrial Ecotoxicology
- Environmental Fate
- Endocrine Properties
- Analytical Services

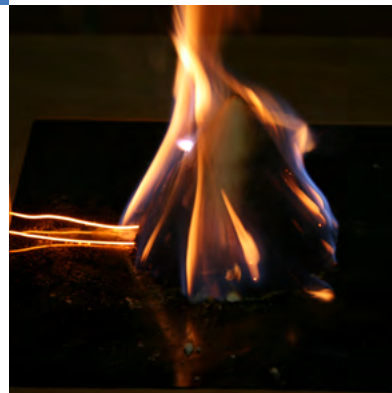

WE TEST YOUR CHEMICALS

If you are the manufacturer, the importer or the trader of a chemical substance, we can support you with the **experimental endpoints** for regulatory compliance:

- Classification and Labelling according to **CLP or GHS**
- Registrations according to **REACH** in the EU or worldwide
- **Safety Data Sheets**
- **Substance Identity Profiles (SIP)** for joint submissions

LAUS - The GLP Lab - offers testing according to the principles of Good Laboratory Practice for more than 20 years. But we do more than test your products.

With 30 years of experience in regulatory compliance testing our experts offer their advice regarding the experimental approach and optimized test strategy, customized for your test item. Since we are a small privately owned company, we are able to treat every customer individually.

So whether you need a Metal Corrosivity study for CLP, a Skin Irritation study for GHS purposes, a simple Biodegradability endpoint, or a full REACH dossier according to Annex VII-X, don't hesitate to contact us.

CHEMICALS

We will gladly prepare a quotation for you. Since we have a lot of experience in this field, our experts will also be available to discuss the experimental approach of your project.
